Summary

Mobile Application Developer with 3+ years of production experience in React Native and Swift. Shipped 3 live apps on the App Store and Google Play. Proficient in REST API integration, Firebase, real-time chat, push notifications (FCM, APNs, OneSignal), in-app purchases (StoreKit 2, Google Play Billing), Xcode build management, CI/CD pipelines, and crash monitoring with Sentry and Crashlytics.

Skills

Languages & Frameworks: React Native (CLI/Expo), Swift 5, TypeScript, JavaScript (ES6+), SwiftUI, UIKit

Mobile Dev Tools: Xcode, Android Studio, CocoaPods, Swift Package Manager, Fastlane, Metro Bundler

Backend & Cloud: Firebase (Firestore, Auth, Storage, Cloud Functions), REST APIs, OAuth 2.0, JWT, WebSockets

Native iOS: AVFoundation, CoreMotion, Vision Framework, CoreData, StoreKit 2, Push Notifications (FCM/APNs/OneSignal)

Architecture & State: Redux Toolkit, Zustand, Context API, MVVM, Clean Architecture, SOLID Principles

DevOps & Monitoring: Sentry, Crashlytics, TestFlight, App Store Connect, Google Play Console, Jest, Detox E2E, Git

Experience

Mobile Application Developer

January 2023 – May 2026

The Brihaspati Infotech

Tools Used: React Native, Swift, Firebase, Xcode

- Shipped 3 B2C mobile apps with 100% first-submission approval rate on App Store and Google Play.
- Built 60fps React Native UIs using Reanimated 2 and Gesture Handler across 15+ device configurations.
- Reduced production crash rate by 35% using Sentry, Firebase Crashlytics, and Xcode Instruments debugging.
- Managed end-to-end app release process including manual submission via App Store Connect and Google Play Console, including release notes, versioning, and build uploads.

iOS Developer Intern

July 2022 – January 2023

Zeroit Solutions

Tools Used: Swift, Xcode, UIKit, CoreData

- Built native iOS components in Swift 5 and UIKit with Auto Layout and programmatic constraints.
- Implemented CoreData persistence layer achieving offline-first functionality for 3 app modules.
- Managed provisioning profiles, code signing, and TestFlight beta distribution for 50+ internal testers.

Projects

Single Apostolics Meet | React Native, Firebase, react-native-iap

Live — 2024

- App Store: <https://apps.apple.com/us/app/single-apostolics-meet/id6526484879>
- Play Store: <https://play.google.com/store/apps/details?id=com.singleapostolicsmeet>
- Dating app with Tinder-style swipe matching — 1000+ daily interactions at <16ms frame rendering.
- Firebase Firestore real-time chat, read-unreads counts, typing indicators, push notification, persona verification.
- Integrated in-app subscription purchases using react-native-iap with 3-tier pricing, achieving 99.8% transaction success rate on both iOS and Android.

Movers and Shakers Dance | React Native, Firebase

Live — 2025

- App Store: <https://apps.apple.com/us/app/movers-and-shakers-dance/id6745867163>
- Play Store: <https://play.google.com/store/apps/details?id=com.moversandshakers.classes>
- Built a video loop/section-repeat feature allowing users to mark a specific segment of a dance tutorial and loop it continuously for focused practice.
- Implemented in-app video download functionality enabling users to save dance tutorial videos to device storage and watch them fully offline — with download progress tracking, local file management, and automatic playback from cache when offline.

LilBeats — Kids Music App | React Native, Track Player, Firebase Analytics

Live — 2023

- App Store: <https://apps.apple.com/us/app/lil-beatz/id6471659112>
- Play Store: <https://play.google.com/store/apps/details?id=com.lilbookz>
- Background audio with Lock Screen Controls for uninterrupted playback on iOS and Android.
- Custom audio queue with shuffle, repeat, and gapless playback for 500+ tracks.

Lacrosse Reaction Time Trainer |SwiftUI(Native IOS), Coremotion, Vision Framework, Storekit, UI Animation

-- In Active Development -IOS

- Building a native Swift iOS sports-performance app that captures high-frequency accelerometer and gyroscope data via CoreMotion to measure and score athlete reaction times with millisecond precision.
- Integrating Apple's Vision framework for real-time face detection to trigger timed stimulus events based on athlete head position and readiness state - a novel UX flow specific to lacrosse training drills.
- Implementing StoreKit 2 for premium drill pack purchases and advanced analytics subscriptions, using App Account Tokens for user-linked entitlement tracking.
- Designing fluid choreographed UI animations using Core Animation and SwiftUI transitions to deliver an engaging, game-like training experience.

Education

B.C.A — Himachal Pradesh University (HPU)

CGPA: 7.14 / 10

Graduated: 2021
